

The **BELTING** Experts

STAY AHEAD OF THE CURVE INTRALOX'S NEW S2400 RADIUS WITH HEAVY-DUTY EDGE

The Intralox® S2400 Radius belt with Heavy-Duty Edge combines a strengthened edge with our patented Load-Sharing™ technology to reduce downtime and extend belt life to 3-5 times that of competing belts. A direct retrofit to legacy S2400 belts, you can upgrade your radius without changing sprockets, designs, or drawings. The best performing radius belt for the food industry.

Benefits

- **Longest lasting and most fault-tolerant radius belt for the food industry**
- **Robust edge design ensures resistance to breakage due to misuse, catchpoints, and incorrect orientation**
- **Load-Sharing edge design improves load sharing across links, reducing stress in critical areas**

Design Features

- **Fault-tolerant edge design**
- **Patented Load-Sharing edge design**
- **Direct retrofit with legacy S2400 belts - no need to change sprockets, designs, or drawings**
- **Each module has a directional arrow design cue**
- **Smaller belt edge opening area and sculpted module features increase safety and reduce catchpoints**

AVAILABLE BELT STYLES

Flush Grid - Friction Top - High Deck - Hold Down Guides (HDG) - Friction Top with HDG

Contact our sales team today for more information on the Modular Plastic Belting and ThermoDrive® Homogenous belting that is right for you, including the **800 Series, 7000 Series and 8050 Series**

ThermoDrive® Belts

- Overcome complicated, time-consuming cleaning and sanitation processes
- Eliminate belt issues caused by tensioning (e.g., mistracking, elongation, wavy edges)
- Avoid hygienic risks posed by fabric belts or exposed fabric or yarn reinforcements

Straight-running Belts

- Longer belt life with less belt wear
- Simplified cleaning and maintenance
- Reduced risk of product loss or contamination
- Enhanced worker safety
- Zero need for lubrication or tensioning
