Your One-Stop Water Tank Supplier

5,000 to 100,000 gallon capacity tanks for FIRE PROTECTION, IRRIGATION & POTABLE WATER

Pioneer Water Tanks offer high-capacity steel water tanks for commercial and residential use. We have 5,000 to 100,000 gallon capacity tanks for fire protection, irrigation and potable water. These tanks are NFPA qualified (NFPA22 compliant for fire protection) and include an antimicrobial tank liner - AQUALINER® Fresh which is NSF-61 certified for drinking water storage. Pioneer’s V-LOCK® tank wall technology provides the strength of corrugated steel and maintains support for the liner while minimizing stress.

Pioneer Water Tanks are delivered and built directly at the project site without the use of cranes, which reduces the overall project cost and allows for the most flexibility in adapting to the site’s installation requirements.

WATER STORAGE SOLUTIONS

ABOVE-GROUND PLASTIC TANKS
- Long-term outdoor service with UV stabilized materials
- Manufactured with FDA approved resin for potable water
- Comes standard with 2” bolted drain fitting and 1/2” bulkhead float valve fitting
- Weatherproof threaded lids & anti-static surge vents
- Molded-in gallon scale (most tanks)
- Offset fill-wells

SEPTIC & CISTERN TANKS
- Rugged, rotation-molded, one-piece, seamless tanks
- Ribbed construction for superior structural strength
- For underground installations 6” to 36” deep
- Designed for installation below surface, only in areas with no vehicle traffic

HIGH CAPACITY STEEL TANKS
- Heavy duty and configurable
- Optional rainwater collector
- Special geosynthetic liners
- Zincalume® Steel tank body
- Protect your water from within the AQUALINER® Fresh liner
- Pioneer V-LOCK® structural construction
- Delivered and built directly at the project site without the use of cranes

Your headquarters for tanks, pumps, hoses, valves & fittings
