TAPER ROLLER QUOTATION WORKSHEET

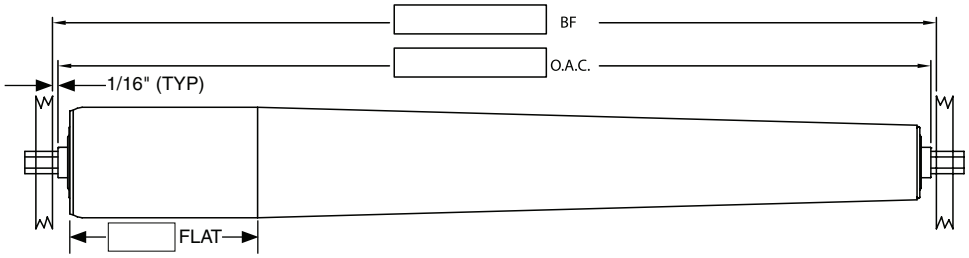
Company: _____ Date: _____
Contact: _____ Quote Due:_____ Desired Delivery: _____
Phone No.: _____ Contact Email: _____State: _____
Green Rubber Kennedy Ag Sales Contact: _____ Quote #: _____

Quantity: _____
Between Frame Width (BF): _____
Overall Cone (OAC) (if roller is not in frame): _____
Roller Diameter at Small End: _____
Roller Diameter at Large End: _____
Wall Thickness (Gauge): _____
Axle Size: _____ (Hex or Round)
Axle Length:_____ (or Standard)

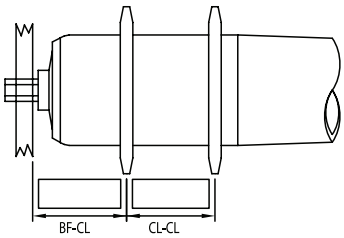
Type of Bearing: _____
Pin Retained:_____
Spring Retained: _____
Groove Center Line: _____ (if applicable)
Sprocket Size: _____(if applicable)
Flat Length: _____(if applicable)
Load Capacity Required: _____

Note: Between Frame (BF) is the distance between the frames of the conveyor. The BF measurement is needed to ensure proper fit into the conveyor. The BF dimension allows 1/16" clearance between the extension on the bearing and the side frame at each end. If the roller is not in the conveyor provide the Overall Cone, the length of the roller from bearing tip to bearing tip (See our Roller Measurement Guide for more information). Utilize the drawings below to depict more detailed specifications.

GRAVITY TAPER



POWER TAPER



GROOVED TAPER
